

# **Hangman Game (Python)**

This is a simple Hangman game built using Python. It runs in the terminal and allows the player to guess a hidden word one letter at a time.

## **About the Project**

- Uses loops (while)
- Uses conditional statements (if-elif-else)
- Works with lists
- Uses Python's built-in random module
- Validates user input

## **How the Game Works**

- A random word is selected from a predefined list.
- The word is displayed as underscores.
- The player guesses one letter at a time.
- The player has 6 incorrect attempts.
- The game ends when the word is guessed or attempts run out.

## **How to Run**

1. Install Python 3.
2. Open terminal or command prompt.
3. Navigate to the project folder.
4. Run: python "HANGMAN GAME.py"
